

You'd never know it now, but the first EARTH-KIND™ Water Wise Demonstration Garden in Dallas County used to be an asphalt parking lot.

Five years after turning over compost in the first garden, the green space at Joe Field Road has expanded into six gardens addressing low water-use gardening in north-central Texas.

Along with lunch and sharing “Down to Earth How To’s”; you can visit our gardens, experience rain water harvesting, and talk to the Dallas County Master Gardeners who have invested to make it all happen. Best of all, 2311 Joe Field Rd. is less than 3 miles from the Omini Hotel. Drive over and spend an “Afternoon of Delight” with us.
